Kedi Ödül Çubuğu

Malzemeler

- 1 tuna fish
- 1.5 cup flour
- 1 egg
- 3 sprig parsley
- 2 tbsp water

Yapılışı

- Prepare for baking**

Preheat oven to 180°C (350°F). Line a baking sheet with parchment paper.
- Finely chop 3 sprigs of parsley until you have 2 tablespoons of minced herbs.
- Make the dough**

Combine 1 can of tuna (drained), 1.5 cups flour, 1 egg, and the chopped parsley in a large bowl. Add water gradually while mixing until a sticky dough forms that holds together.
- Dust your work surface generously with flour. Transfer the dough to the floured surface.
- Shape the treats**

Roll the dough with a rolling pin to 1/4 inch (6mm) thickness, adding more flour as needed to prevent sticking.
- Cut the dough into thin strips about 1/2 inch wide using a knife or pizza cutter.
- Arrange the strips on the prepared baking sheet, spacing them 1/2 inch apart so they don't stick together while baking.
- Bake**

Bake for 15-20 minutes until the treats are lightly golden brown and firm to the touch. Cool completely on the baking sheet for 10 minutes before serving to your cat.

İpuçları

Dust your work surface generously with flour to prevent the dough from sticking when rolling it out.

Store finished treats in an airtight container at room temperature for up to two weeks to maintain freshness.

Roll the dough to about 1/4 inch thickness for treats that bake evenly and have the perfect chewiness.

Use kitchen shears or a pizza cutter to create uniform strips that will bake at the same rate.

Let treats cool completely before storing to prevent condensation that could make them soggy.

Test one treat with your cat first to ensure they enjoy the flavor before making large batches.

Double-check that your tuna is packed in water, not oil, as excess oil can upset your cat's stomach.

Freeze extra treats in portion-sized bags for longer storage and easy daily access.
